Software engineer focused on production AI, backend systems, and automation. Built self-healing workflows that auto-resolve 60%+ of failures, reduced incident response time by 70%, and shipped measurable performance improvements across distributed systems.

EXPERIENCE

Curefit · House of Cult - Software Engineering Intern

May 2026 - Present

- Built agent-driven root-cause analysis and self-healing workflows across campaign, segmentation, and notification services, automatically resolving 60%+ of delivery failures.
- Reduced incident response time by 70% by integrating Coralogix, AWS SQS, Sentry, and Metabase into automated monitoring and remediation pipelines.
- Designed auditable, human-in-the-loop operations workflows targeting an 85% reduction in manual policy review using Java, Python, REST APIs, MySQL, and Kubernetes.

WorldQuant BRAIN - Quantitative Research Consultant · Expert

May 2025 - Apr 2026

- Developed and backtested quantitative alpha models that improved strategy performance by 20%.
- Submitted 150+ models; 12+ passed all checks, including Sharpe above 2.25 and turnover below 30%.

Jortke - Software Engineering Intern

Mar 2024 - May 2024

- Reduced high-traffic endpoint latency by 15-20% through Redis caching and queuing; improved average response time from 220 ms to 150 ms.
- Built and maintained 10+ REST APIs, reducing database queries by 30%.

SELECTED PROJECTS

Automated Job Application System

React · Node.js · MongoDB

- Built a full-stack Chrome extension that parses unstructured resume PDFs into editable profiles and autofills job applications, with asynchronous extraction and JWT-authenticated APIs.

Graph Node Classification with GCN

Python · TensorFlow · Keras

- Improved node classification accuracy by 15% using two-hop neighborhood aggregation and weighted loss on the imbalanced CORA citation dataset.

PyOS - Modular Operating System Simulation

Python · CLI · Multithreading

- Built a terminal OS simulation with password-hashed authentication, concurrent command execution, process scheduling, and a shell that accepts new commands in under 10 lines.

EDUCATION & SKILLS

Indian Institute of Information Technology, Gwalior

Nov 2022 - Jun 2027

Integrated B.Tech in Information Technology + MBA · CGPA 7.97/10

Languages: Java, Python, JavaScript, C++, SQL **Backend:** Node.js, Express, REST APIs, microservices, JWT **AI:** AI agents, RAG, LangGraph, TensorFlow, prompt engineering **Infrastructure:** Kubernetes, AWS SQS, Redis, Jenkins, Coralogix, Sentry **Data:** MySQL, MongoDB, Pandas

SELECTED ACHIEVEMENTS

LeetCode Knight (1820) · CodeChef 3 Star (1661) · Codeforces Pupil (1300+) · 1,000+ algorithmic problems solved · Global Rank 180 in CodeChef Starters 143 Div. 2 · Google Big Code 2026 semi-finalist
